

Application No.: Not Yet Assigned
Preliminary Amendment
Attorney Docket: POWRD-023G

REMARKS

The present application is a division of pending United States Application Serial Number 09/876,763 entitled Thermal Interface Wafer, filed June 7, 2001. With respect to such parent case, a restriction was imposed with regard to the originally-submitted claims. Specifically, Claims 1-20 and 33-36 were drawn to a thermal interface, classified in Class 428, subclass 209; Claims 21-24, were drawn to a method for using a thermal interface, classified in Class 165, subclass 185; and Claims 25-32, were drawn to a method for making a thermal interface, classified in Class 156, Subclass 250.

By this amendment, Applicant has cancelled Claims 1-20 and 25-32, drawn to the first and third claim groups and seeks to pursue those drawn to a method for fusing a thermal interface as claimed by Claims 21-24.

To the extent the Examiner has any questions, requires additional information, or has any suggestions to expedite the prosecution of this case, he is invited to contact Applicant's counsel at the telephone number listed below.

If any additional fee is required, please charge Deposit Account Number 19-4330.

Respectfully submitted,

Date: 9/24/03
